RE: Iron Pony Letter of Recommendation

To Whom It May Concern,

It is with immense respect that I write this letter of recommendation for The Iron Pony. Working closely with Kerry, Billy and Bobbie throughout the course of a large data center project, The Iron Pony was an incredible team player and someone we could count in regardless of the situation. From the day The Iron Pony mobilized to the final closeout, The Iron Pony was a pleasure to work with.

The Iron Pony did an excellent job throughout the course of this project and contributed an incredible amount to the overall team. On numerous occasions, deadlines would be crunched or situations would arise in which we would rely on The Iron Pony to remedy, and through each of those circumstances The Iron Pony was able to provide the appropriate manpower and material to ensure it was taken care of on time. In every aspect, what Kerry and Bobbie would communicate from the office side, Billy and his team was able to support on the field side. Given the intense timeline data centers require, The Iron Pony never failed to provide quality work in any situation we asked. Whether that be contractual work or additional work requested from the general contractor, their quality never lacked.

In closing, The Iron Pony would a great asset to any company looking to fulfill their concrete sealing/epoxy needs and I would gladly recommend them for any endeavor they seek to pursue.

Please feel free to contact me and discuss further.

Respectfully,

A handwritten signature in black ink that reads "Kolten E. Booher". The signature is written in a cursive, flowing style with a large initial 'K'.
